Artist Statement

Aphra Shemza is a UK based multimedia artist with over a decade of experience working in the arts. She creates interactive sculpture and installations for private collectors and public institutions and exhibits her work around the globe.

Inspired by her grandfather, the well-known abstract painter [Anwar Jalal Shemza](#), her work explores her Islamic cultural heritage, sustainable practice and creating art for all. As an artist and activist, Shemza finds ambitious ways to fuse methodologies from the past with new innovations in technology to imagine what the role of art could be in the future.

Shemza combines abstraction with traditional sculpting techniques and technology to create her work. As a sculptor her main medium is light, which she manipulates to create works that change over time. Handmade and bespoke interactive circuits are embedded within the pieces and this creates work which responds to the viewer or the space around it. Just as abstraction was said to be a 'universal language for the masses', Shemza has created a new visual language for a contemporary audience - one that explores the impact and legacy of technology on our world.

Shemza works in series. Each series has a different thematic exploration and a different aesthetic quality. From migration to climate change, Shemza explores many themes and ideas within her work and advocates for a sustainable practice. She uses her art-making as a tool to explore key concepts which are central to her individual journey through life.

Shemza's mission is to make art accessible to all which she does through her workshops, talks and participatory art projects.

She is a resident at Somerset House Exchange, a fellow of Royal Society of Arts, a Member of Royal Society of Sculptors, artist in residence at SPACER, a board member of EVA London conference and Manager of the [Estate of Anwar Jalal Shemza](#). Between 2012-2022 Shemza co-founded and was Director of [Art in Flux CIC](#).

ΔPHRΔSHEMZAΔ
